STEP 1 OF 9

👋 Hello! Kuppa helps you understand the changes that you can make to your home to make it cheaper to run and more comfortable all year.

By entering your address you're agreeing to allow us access to your EPC information and public data on your home.

Get Started

To get started, we will use your address to check if your home has an Energy Performance Certificate or EPC.

- Low cost, council funded measures via Cost of Living Fund
- Pipeline for ECO, SHDF etc.
- Get an EPC

Owner Occupiers & Landlords

Install Air Source Heat Pump

£5,000 - £10,000

Heat pumps are significantly more efficient than traditional boilers and use cleaner electricity, so will reduce your home's carbon footprint. A heat pump takes heat at a low temperature from the air or ground, increases that heat to a higher temperature and transfers it into your home to provide heating and hot water.

[Find Supplier](#)

£ Bill Savings: £195/yr Carbon: 1.7tCO₂/yr Payback: > 25 years

Loft Insulation

£2,023 - £2,349

Insulate your loft with insulating blankets and boards. The insulation thickness will depend on the space you have available. Insulating boards will allow you to use your loft for storage. Where you insulate you must also ventilate. If you have any mould or damp in your property, please contact the City of Wolverhampton Council on 01902 551155 for advice.
